

AMAN SARAOGI

Data Analyst • Python • SQL • Power BI

Kolkata, India • saraogiaman003@gmail.com • 8777575990 • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with internship experience at Aglo Packaging Pvt. Ltd., where I built Power BI dashboards, automated Python-based reports, and cut reporting turnaround by 30%. Proficient in Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, and Power BI, with hands-on project work spanning customer churn analysis, banking risk EDA, and regional sales reporting. B.Tech graduate in Civil Engineering from NIT Durgapur, seeking a data analyst or business intelligence role where I can turn complex datasets into decisions that matter.

WORK EXPERIENCE

Maths Faculty – Bakliwal Tutorials

May 2026 – Present

- Designed and delivered structured lessons for 30+ students across batches, adapting content to individual learning needs and pacing
- Tracked and analysed performance data for 30+ students using Excel, identifying learning gaps and improving average test scores by ~15%
- Maintained weekly attendance and performance records in Excel for 3 batches, enabling timely progress reports to management

Data Analyst Intern – Aglo Packaging Pvt. Ltd.

Dec 2025 – Jan 2026

- Analysed 5+ operational and business datasets (10,000+ records each) using Python and Excel to identify trends and performance gaps
- Built 4 Power BI dashboards tracking 10+ KPIs across production and sales, used weekly by senior management for decision-making
- Automated recurring reports using Python and Excel, **cutting reporting turnaround time by 30%**
- Transformed 8+ raw data sources into clean, structured, analysis-ready datasets, reducing data preparation time for the team by ~40%

Civil Engineering Trainee – Damodar Valley Corporation (DVC)

May 2025

- Supported data-backed monitoring of 3 civil infrastructure projects across 10+ site inspections, tracking maintenance schedules and contributing to structured project documentation

Graphic Designer – SimpleSample

Jul 2024 – Dec 2024

- Designed 50+ digital and print creatives for 3 marketing teams, delivering brochures, banners, and social media assets on time with consistent visual standards

PROJECTS

Banking Risk Analysis — Python, Pandas, NumPy, Matplotlib, Seaborn [GitHub ↗](#)

- Performed EDA on a banking dataset of 30,000+ loan records to identify key drivers of default risk, including credit history, loan-to-income ratio, and employment tenure
- Cleaned and processed data using Pandas and NumPy — handled missing values, removed outliers, and engineered features such as debt-to-income ratio to improve analytical accuracy
- Built correlation heatmaps, distribution plots, and box plots using Matplotlib and Seaborn; found that applicants with a loan-to-income ratio above 0.4 accounted for over 60% of defaults
- Derived actionable recommendations from findings — flagging high-risk applicant profiles and suggesting tighter lending thresholds for low credit score segments

Customer Churn Analysis — Python, SQL, Power BI [GitHub ↗](#)

- Performed exploratory data analysis (EDA) using Python (Pandas, Matplotlib, Seaborn) and queried structured data with SQL to uncover churn patterns across 7,043 Jio telecom customers (26.5% churn rate)
- Used SQL to segment and filter customer data by gender, senior citizen status, tenure, and contract type; visualised insights in Power BI to identify key churn drivers
- Implemented interactive slicers and KPI cards to enable dynamic filtering and executive-level reporting on churn metrics

Regional Sales Analysis — Python, Power BI

- Cleaned and transformed 50,000+ rows of sales data across 5 regions using Python and SQL, resolving inconsistencies and preparing the dataset for analysis. [GitHub ↗](#)

- Performed EDA to uncover regional sales trends, identifying the top 3 performing product categories and 2 underperforming regions with high growth potential.
- Built an interactive Power BI dashboard with 6 visuals tracking revenue, profit, and customer insights across regions. [Dashboard ↗](#)
- Generated 4 data-backed business recommendations targeting underperforming regions, presented as an executive summary to improve sales strategy.

EDUCATION

National Institute of Technology, Durgapur B.Tech in Civil Engineering CGPA: 6.98	2022 – 2026
CBSE – Class XII DPS Ruby Park 84.8%	2021
CBSE – Class X DPS Ruby Park 92.2%	2019

SKILLS

Languages: Python, SQL
Visualisation Tools: Power BI, Tableau, Matplotlib, Seaborn
Libraries: Pandas, NumPy, EDA, Data Cleaning, Feature Engineering
Other Tools: Advanced Excel, Git, Photoshop, Adobe Illustrator, Blender

CERTIFICATIONS

- Data Analytics Advanced – Udemy (Python, SQL, Power BI, Tableau)

POSITIONS OF RESPONSIBILITY

Convenor – Debating Society, NIT Durgapur	Feb 2023 – Present
• Led a 25-member team to organise VISTAAR, Eastern India’s largest intercollegiate debating fest • Developed and maintained the society website; designed posters and promotional materials	

EXTRACURRICULAR ACTIVITIES

- Self-learning in stock trading, portfolio analysis, and financial markets
- Table Tennis • Competitive Gaming
